

## Navigation Team Outcomes

The Navigation Team is a group of multi-disciplinary outreach workers who go to areas where high-impact camping exists. The team offers access to services including shelter, health supports (medical, mental health, substance use), transportation assistance, identification and benefits assistance, and housing and rental assistance. This work is intensive and requires daily engagement that can take up to several weeks.

The following table shows the various sites the Navigation Team has worked at and the outcomes from their work there. You can read more about the Navigation Team [here](#).
